Art Unit: 1743

1. Claims 48-49, 73, 75-104, 106-126, 152-198, 200-219 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for one or more dispensers supplied with plural solutions and a positioning system as claimed, the dispensers and positioning system together being operated so as to produce an array of ligands or substances as claimed, does not reasonably provide enablement for an automated apparatus as claimed. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. For example, in claim 48, how does “a solution of a monomer or polymer” produce 100 different ligands? The disclosure teaches that plural monomers are applied in plural steps to synthesize polymers, or different polymers are applied to different sites, but there is no teaching of a solution of a monomer or polymer producing 100-1000 different ligands or substances. The claims provide no operative connection between the positioning system and dispenser to perform the required steps for synthesis, i.e., “configured to position...until an array...is formed” lacks essential features because it omits how the positioning system and dispenser are operated together—does the translational controller coordinate positioning and dispensing? That is, does the controller control dispensing at the localized areas?

1. Claims 48-49, 73, 75-104, 106-126, 152-198, 200-219 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1743

2. It is unclear how the “solution of a monomer or polymer” relates to the ligands arrayed. See also claims 152 and 207. How does a solution of a monomer or polymer produce 100-1000 different ligands?

3. Applicant's arguments filed March 28, 2006 have been considered but are not persuasive.

Applicant argues that the amendments overcome the rejection, but they do not for the reasons above.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
